

Literacy in the Making

Build Literacy Skills

Enhance Social-Emotional Skills

Develop Maker Skills

Literacy in the Making

is an interactive, engaging, virtually-delivered program that offers children in grades K-5 the opportunity, through making, to deepen their understanding of literature and explore social-emotional themes such as resiliency, empathy, and self-expression.

Students use their “heads, hearts, and hands” as they develop the mindsets needed to become empowered, creatively confident, future-ready 21st century learners.

Facilitators

Maureen Carroll, Ph.D., is the Founder of Lime Design and has taught at the elementary, middle school, community college and university levels. She currently teaches at Stanford's d.school.

Lois Logan, M.S., is a Principal Facilitator for Lime Design, and has experience working with children as a classroom teacher, a STEM program designer and a Museum and Maker Space Educator.
